https://msholehhudin.vercel.app | Jakarta, Indonesia — Open to Remote & Relocation

PROFESSIONAL SUMMARY

Frontend-focused Fullstack Engineer with **3+ years of professional web development experience** and 7+ years of experience across IT, healthcare, media, and business operations.

Experienced in building production web applications using **React.js, Next.js, Vue.js, TypeScript, Node.js, and Laravel**, with a particular focus on **AI integration, document automation, real-time systems, and data-driven operational workflows**.

Hands-on experience integrating external AI services into existing applications, including **Google Gemini for structured generative AI workflows** and **speech-to-text capabilities for contact-center communication**. Also experienced in **extracting structured information from PDF documents and transforming it into application data**, reducing repetitive manual entry.

Recent work includes an AI Sales Page Generator, a healthcare delivery SaaS, an enterprise omnichannel contact center, and an EV battery monitoring dashboard.

Open to freelance and remote opportunities involving AI-enabled applications, automation, document processing, and modern web platforms.

TECHNICAL SKILLS

AI & Automation	Google Gemini API · Generative AI Integration · Prompt Engineering · Structured JSON Generation · AI Service Integration · Speech-to-Text Integration · Document Data Extraction · Data Processing & Transformation
Frontend	React.js · Next.js · Vue.js 3 · TypeScript · JavaScript ES6+ · Tailwind CSS · HTML · CSS
Backend	Laravel · Node.js · Express.js · REST API · PHP · Inertia.js · Laravel Sanctum
Data & State	PostgreSQL · MySQL · Supabase · Firebase · TanStack Query · Redux · Pinia
Real-Time & Infrastructure	WebRTC · WebSocket · Firebase Realtime Data · Docker · Docker Compose · Linux · Vercel
Database	MySQL, PostgreSQL

PROFESSIONAL EXPERIENCE

Fullstack Engineer PT. Asia Outsourcing Services — Jakarta, Indonesia	2023 – Present
- Built and maintained 3+ client-facing fullstack web applications used by businesses clients, improving operational workflows and reducing manual processes - Developed Bluespider Contact Center handling real-time communication (WebRTC, Firebase), supporting multi-channel interactions (WhatsApp, email) for customer service teams - Improved frontend scalability by implementing modular component architecture (Vue 3 + Pinia), reducing development time for new features - Managed deployment pipelines using Docker Compose and SSH-based Linux server environments - Continuously improved React.js and Next.js expertise through freelance and SaaS projects alongside professional role	
IT Engineer & Internal Developer PT. Duta Visual Nusantara Tivi Tujuh (TRANS7) — Jakarta, Indonesia	2021 – 2023
- Developed internal desktop applications using C# and MySQL to support operational needs of the On Air division at a national TV broadcasting network - Maintained server infrastructure and IT systems supporting live broadcasting operations, ensuring high uptime in a time-critical environment - Handled hardware, software, and network troubleshooting across on-air broadcast environments	
IT Support & Graphic Designer RS Mitra Sehat Medika — Pandaan, Indonesia	2019 – 2021

- Managed IT systems and technical support for hospital operations, ensuring reliability of critical healthcare infrastructure
- Produced digital design assets and visual materials; developed foundational knowledge of healthcare workflows — directly informing later SaaS development in the same domain

SELECTED PROJECTS

AI Sales Page Generator

[Next.js](#) · [TypeScript](#) · [Laravel](#) · [Google Gemini](#) · [MySQL](#) · [Tailwind CSS](#)

AI Integration / Generative AI

- Built a fullstack AI application that transforms structured product information into a complete sales-page content structure.
- Integrated **Google Gemini through a Laravel service layer** rather than building an AI model from scratch.
- Designed prompts to produce **structured JSON output** containing headlines, benefits, features, social proof, pricing, and call-to-action content.
- Implemented AI response cleaning, JSON parsing, validation, and persistence before presenting generated content to users.
- Built a Next.js frontend consuming the Laravel REST API and rendering the generated structured content into a visual sales-page preview.
- Implemented generation history so users can retrieve and review previously generated content.

AI workflow:

User Input → Laravel API → Prompt Construction → Google Gemini → JSON Validation → Database → Next.js UI

Portfolio: <https://msholehhudin.vercel.app/>

Bluespider Contact Center

[Vue.js](#) · [Laravel](#) · [Firebase](#) · [WebRTC](#) · [Docker](#) · [Inertia.js](#)

Enterprise / Real-Time / AI Integration

- Developed frontend and backend features for an enterprise omnichannel contact-center platform supporting **WhatsApp, email, voice communication, ticketing, and agent management**
- Integrated **AI-assisted speech-to-text capabilities** into voice communication workflows to convert customer-agent conversations into text data.
- Connected external AI/service integrations with an existing **Laravel + WebRTC architecture**.
- Implemented real-time communication and presence using **WebRTC and Firebase**.
- Developed agent queueing, chat distribution, monitoring, and real-time state management for customer service operations.
- Worked with production systems involving concurrent communication sessions and high-frequency state updates.

AI workflow:

Voice Interaction → Speech-to-Text Service → Text Data → Contact Center Workflow

mediXpress — Healthcare Delivery Platform

[Next.js](#) · [Supabase](#) · [TypeScript](#) · [Tailwind CSS](#) · [Zod](#)

SaaS / Document Automation / Healthcare

- Designed and developed a fullstack healthcare delivery platform addressing pharmacy queue and medication delivery workflows.
- Implemented a **document automation workflow that extracts structured information from cashier-generated PDF documents**.
- Transformed extracted document data into application-ready fields, reducing repetitive manual form entry for operational staff.
- Allowed users to review and adjust extracted information before submitting the final form, providing a validation layer between document extraction and business processing.
- Implemented SSR, modern state management, authentication, and real-time data functionality using Next.js and Supabase.
- Designed the system around real healthcare operational workflows and usability requirements.

Document automation workflow:

PDF Document → Data Extraction → Structured Data → Form Population → User Review → Submission

EV Battery Monitoring Dashboard

[Next.js](#) · [TypeScript](#) · [PostgreSQL](#) · [Supabase](#) · [Tailwind CSS](#) · [Zod](#)

Data Processing / Operational Dashboard

- Built an internal monitoring dashboard for tracking EV battery-swap cabinets across multiple branches.
- Designed data-heavy workflows for cabinet status, battery slot states, swap activity, and heartbeat monitoring.
- Implemented **server-side search, filtering, sorting, and pagination** for operational cabinet data.
- Designed detailed 12-slot cabinet monitoring views with multiple battery states and state-specific visualization.
- Connected Next.js App Router to PostgreSQL through Supabase and structured the data flow from database queries → API routes → UI components.

- Seeded the system with **10 branches, 50 cabinets, 600 battery slots, and 20,000 swap transactions** to demonstrate operational-scale data handling.

Joy Inspec — Vehicle Inspection CRM Platform

[React.js](#) · [Next.js](#) · [TypeScript](#) · [Tailwind CSS](#) · [Zustand](#) · [Zod](#)

Company Profile / Operational Dashboard / CRM

- Developed a production-ready CRM system for a vehicle inspection business operating across Jabodetabek
- Built responsive landing page and internal dashboard used for managing inspection workflows and reporting
- Collaborated with backend engineer to deliver real client requirements from concept to deployment
- Deployed on Vercel (for demo) with modern frontend architecture and optimized performance

EDUCATION

Bachelor's Degree in Informatics Engineering

Universitas Brawijaya, Malang
Graduated 2018

PROFESSIONAL DEVELOPMENT

2026	Microsoft Certified: Data Science & Generative AI Developer Path. — Dicoding Academy
2025	AI & Machine Learning Fundamentals — Dicoding Academy
2023	Frontend Development: React.js — Alterra Academy Indonesia
2022–2023	Full-Stack Web Development — Dicoding Academy (incl. AWS Cloud Practitioner)
2021	Backend Development: PHP & Laravel — Sanbercode

WORK PREFERENCES

- ✓ Open to **freelance and fully remote opportunities**
- ✓ Comfortable working with international teams and communicating in English
- ✓ Experienced with asynchronous collaboration and distributed development workflows
- ✓ Interested in projects involving **AI integration, document automation, data processing, and operational software**
- ✓ Willing to relocate if required
